PROJECTS

AI Interview Prep Platform | *MERN, JWT Auth, Gemini API*

GitHub

- Built an AI-powered platform generating role-specific and experience-level-tailored interview questions using the Gemini API
- Implemented an initial set of 8-10 questions with a "load more" feature generating 4-5 additional questions per click
- Built a pin/bookmark feature for important questions with detailed answers for personalized revision
- Enabled user authentication with login/logout, protected routes, and session expiry; deployed on Vercel and Render

Resume Builder | *MERN, JWT Auth*

GitHub

- Built a full-stack Resume Builder using React.js, Node.js, Express.js, and MongoDB, with JWT-based authentication and session expiry.
- Designed 3 distinct resume layouts with a choice of 10+ color themes for customization.
- Built a live preview feature allowing users to view formatting changes in real time while editing content.
- Implemented PDF export functionality and deployed the app on Vercel (frontend) and Render (backend).
